

Any type of notebook is fine.

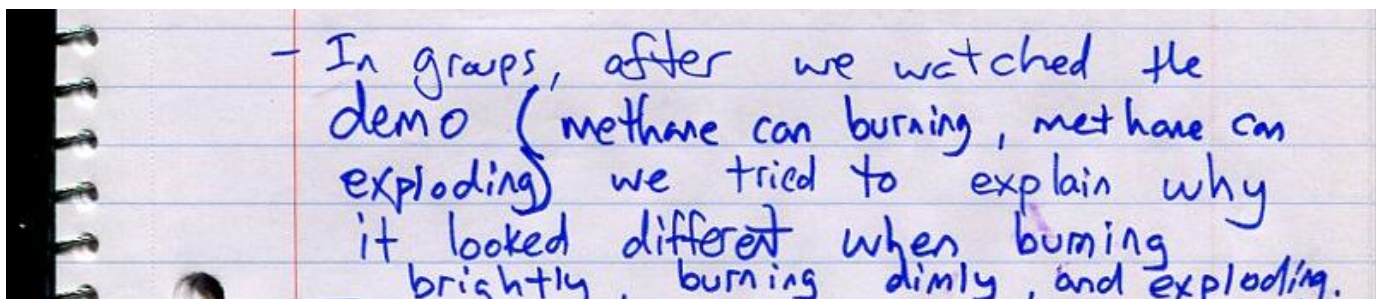

If a calculator costs more than ten dollars and less than thirty dollars it's usually a scientific calculator.

More expensive calculators, like graphing calculators, will work too.

Memorize the three big ideas that we will use every day in this class.

In chemistry:

1. Chemists Describe Matter.
2. Chemists Describe How Matter Behaves.
3. Chemists Describe The Role of Energy in What They Observe.

Homework tonight: none.
