

**Online Extra Credit assignment:**

Write a letter that I can show to my tenth graders next year.

**Due:** Tomorrow at midnight (11:59 PM, June 6)

**Worth:** 8 pts / 16 pts extra credit on homework points

**Instructions:** It's hard to think back to September, but try. Write a letter to this year's freshmen giving them advice for doing well in chemistry. Your letter should start with a salutation, something like "Dear Chemistry Student". It can be signed with your name or an anonymous name (I'll leave that on the letter when I print it).

Especially tell them

- what to expect
- things that caught you off guard or surprised you
- how studying is different for this class
- how you got low scores at first and then got better
- your unique tricks and tips

If the letter is okay it's worth up to 8 pts, if it's good enough to actually use next year I'll give up to 16 pts.

Email your final letter by midnight to my school gmail: [eagenest@madison.k12.wi.us](mailto:eagenest@madison.k12.wi.us)
