

The Test is FRIDAY.

Purpose: Review the math problems.

Warmup: "The bubbles of boiling water contain water"

They do not contain  $H_2$  or  $O_2$ .

We memorized that these are diatomic:

$H_2$   $O_2$   $F_2$   $Cl_2$   
 $Br_2$   $I_2$   $N_2$

WHEN ALONE, THESE USUALLY FORM 2-atom molecules, but in compounds they can have any number.

WARMUP: THE BUBBLES IN  
BOILING WATER CONTAIN  
THIS:
