

Purpose: Invent rules to describe how charged matter can push or pull with invisible force.

New seats next Monday

Warmup: Copy the words and cartoons from the board. Place an arrow at each letter to describe the direction of force.

The classical name for amber was *electrum* (ἤλεκτρον *ēlektron*), connected to a term for the "beaming Sun", ἠλέκτωρ (*ēlektōr*).

You should know how to draw force vectors for everyday situations.

Learn how to draw them so that they show both amount of force and direction of force?

Know these for Friday's quiz.
